During **May**, if relatives and neighbours try to involve you in their disputes, make a graceful exit and leave them to get on with it. **July** will bring a pretty big change in your direction at work or regarding an important personal ambition, and this may force you to focus more on your home, family and personal life for a while. **August** brings a touch of passion for some.

May: bad luck and difficult circumstances have almost flattened you over the past few months, but you are turning the corner at last. The first improvement will be an increase in your finances, but the main change for the better will come in **August**, when friends and family rally round and issue welcome invitations. Home life will be disrupted in **August**, but it will also be fun.

A series of unexpected events make **May** an up and down month, but by June, you will be able to regain control of your destiny. Finances will pick up in **July**, but you will have to hold back some of the extra bounty to cope with unexpected expenses. Someone you really like will not be honest with you, so take their smooth talk with a pinch of salt.

Those of you who are keen to develop your spiritual interests will find it hard going, and you may feel blocked or held back by circumstances. The best approach would be to leave these aside for now, and focus on other sides of your life for the time being, such as work, relationships and friendships. A breakthrough in love and finances comes in **August**.

May kicks off what will turn out to be a transformative year, which will see many of you moving house or adapting your working life in some way. This is all for a good purpose. A brief period of delay and frustration at the start of **June** clears away, but two eclipses in **August** will allow you to sweep an old problem away for good. A spur-of-the-moment break in **September** will be successful.

New and exciting people will flood into your life in **May** and **June**, and single Virgoans could find yourselves being swept off your feet. By **July**, friendships and family relationships will start to take precedence, as reality starts to re-enter your mind, heart and life. Opportunities to improve your finances arrive in **July** and **August**.

The best you can hope for in **May** and **June** is to look into things and make plans, but you won't be able to put much into operation until **July**. Even then, you may face unexpected delays. **August** will be a time when you can go full speed ahead with plans, especially those that involve travel or anything else that expands your horizons.

For a sign that usually has plenty going on, this will be a remarkably peaceful phase, at least as far as **May** and **June** are concerned. **July** brings a host of goodies, including romance, passion and joy for some, and enjoyable holidays and adventure for others. You will have to put your heart into work in **August**, but your efforts will pay off

Gloomy old Saturn is still working its way through your sign, bringing career success to some and increased burdens to others. Although things begin to pick up in **July**, progress will be slow, and the emphasis will still be on getting the job done well. Some of you will move house or refurbish one this summer. August will bring fun, travel, new faces and an opportunity to use your spiritual gifts.

With transformative outer planets making life uncomfortable, you have a lot to put up with, but there are some welcome breaks in the clouds. The more you get out and about the better, as the connections you make now will lead to pleasant events in the future. Romance and family life pick up in **July**, and an old flame re-connects in **August** but don't rush into romance without thinking.

You need to get out and expand your horizons, because that's where you'll make the right contacts. You can relax a bit during **June** and **July**, with sporting activities, playing with your children and having fun being high on the agenda. **August** will bring career matters into focus, as opportunities come your way from people who are new to you. Be careful not to put your foot in it, though.

If you work in the spiritual arena, you can expect success and achievement during **May** and **June**, but **July** is a good time to relax and have fun. A loved one may spring a pleasant surprise on you then. **August** brings you down to earth with a bump, as practical matters around the home will need your attention at that time, while health matters will also need your attention.
